### DETAILED ACTION

Claims 1-13 are currently pending. It is noted that nonstatutory ( e.g. use claims) are being treated as method claims for purposes of lack of unity.

#### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a compound of the general structural formula I.

Group II, claim(s) 8, drawn to a method of using a compound of the general structural formula I for preparing a uPAR antagonist.

Group III, claim(s) 9, drawn to a method of using a compound of the general structural formula I for controlling tumors.

Group IV, claim(s) 10 and 12, drawn to a method of using a compound of the general structural formula I for preparing a targeting vehicle for cells expressing uPAR.

Group V, claim(s) 11 and 13, drawn to a method of using a compound of the general structural formula I for preparing an angiogenesis inhibitor.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the above-identified methods have different method objectives, utilized different reactants and/or reaction conditions and/or steps and require different and separately burdensome manual/computer bibliographic searches. It is noted that claim 1, the general structural formula I does not serve to properly link any of the claims,

Art Unit: 1654

including the method ("use") claims, but even, assuming *arguendo*, if it did, claim 1 fails to represent a special technical feature since specific compounds of general structural formula I were known in the prior art. See e.g. Kessler WO 98 46632 A, especially pp. 4-7, claims 1-10, 13-16 and as cited in the Specification.

3. The invention is drawn to a plethora of many different compounds/peptides, which are contained in many different compositions. The compounds/peptides vary distinctly in their structures and functions. Thus, an individual search is required of each individual compound/peptide. Therefore, as part of electing one of the groups as the elected invention, Applicant is required to elect a specific compound/peptide containing the specific structure, to which the elected invention will be examined on the merits as drawn to; as well as identifying those claims to which the elected composition is drawn. This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
